

Environment Policy

Our Commitment

We consider respect for the environment to be one of the central elements of the concept of sustainability, and particularly one of the three pillars for reaching a sustainable energy model.

The Group's commitment to leadership in the development of sustainable energy is aligned with the achievement of Sustainable Development Goals (SDGs) approved by the United Nations.

Iberdrola Environment Policy

As a member of the Iberdrola Group ("the Group"), Iberdrola Australia is guided by the Group's *Environment Policy*.

To implement the Group's commitment to the environment and boost environmental sustainability, the following principles apply to all its activities.

- Develop a sustainable model that is respectful of nature, biodiversity, and historical and cultural heritage.
- Meeting or exceeding legal and applicable environmental standards.
- Apply the principles of avoid, mitigate, or offset in all activities.
- Promote innovation through research and support for the development of new technologies and best environmental practices.
- Use natural capital sustainably.
- Conserve, protect and promote the development and growth of natural heritage.

Iberdrola Australia's Management Team shall

- Respect our privilege to operate our assets and preserve the environmental values of our asset locations and communities.
- Adopt procurement principles that consider the environmental impact of products and services, supporting the purchase of sustainable products.
- Strive to exceed our environmental impact by actively avoiding environmental impacts through design phase and conducting environmental impact mitigation at all sites.

- Promote the protection and enhancement of biodiversity through employee awareness, stakeholder engagement and direct support of community campaigns, studies, and initiatives.
- Pursue continuous improvement by reviewing our environmental management system, objectives, targets, and plans.

Ross Rolfe

Chairman and Chief Executive Officer
