

Environmental Policy

Medallion Metals accepts its responsibility in contributing to a sustainable and clean environment and undertakes to facilitate all works with as minimal damage to the environment as possible with future generations in mind.

Medallion Metals undertakes to:

- Be active in enforcing our environmental policies, standards and procedures through our EHS programme and ensure that they are communicated to and understood by all of our people and promote a culture of caring for the environment.
- Focus intently on the continual improvement of our EHS system.
- Set measurable Environmental Targets and Objectives with our people relating to Environmental Management and review and monitor these to ensure they are met.
- Actively engage our personnel in EHS and conduct periodic risk assessments in accordance with the system to ensure environmental risks are minimised.
- Ensure that our policies, standards and procedures comply with all relevant laws and regulations.
- Maintain our assets and machinery to a standard that will create minimal environmental damage.
- Actively promote a culture that focuses on prevention of pollution.
- Provide training and facilitate emergency clean up systems so that in the event of a spill or environmental damage, we have the ability to eliminate or minimise any permanent damage to the environment.
