

## **Australian Projects Health, Safety, Sustainability and Quality Policy (HSSQ)**

CORIO Generation has established a number of Offshore Wind renewable energy projects in Australia. This policy outlines the Australian Projects commitment to undertake all its activities in a healthy, safe, sustainable and socially acceptable manner.

### **Our commitment to HSSQ**

The Australian Projects Management is fully committed to providing and promoting a positive work health safety, environment and social (HSSQ) culture, aiming for no harm to personnel, and to avoid adverse impacts to the environment and the communities in which we do business. We will achieve this by:

- Ensuring compliance with all applicable laws and regulations;
- Providing strong and visible leadership on HSSQ matters;
- Developing management systems in accordance with international standards and best practices with regard to HSSQ;
- Promoting a balanced HSSQ culture that encourages open communication, engagement and consultation with and between employees, contractors, partners and communities on responsible HSSQ management issues;
- Providing the necessary resources, information, instructions, training and supervision to personnel to proactively improve our WHSES performance;
- Promoting continuous improvement by regularly reviewing and updating the HSSQ Management System as well as by continuously training and instructing our personnel;
- Ensuring HSSQ impacts and risks are identified, assessed and eliminated or reduced to as low as reasonably practicable for all activities; and
- Measuring, monitoring and continuously improving our HSSQ performance.
