<b>Title of proposal</b>	<b>2020/8631 - Bowmans Creek Wind Farm</b>
<b>Section 1</b>	
<b>Summary of your proposed action</b>	
<b>1.1 Project industry type</b>	Energy Generation and Supply (renewable)
<b>1.2 Provide a detailed description of the proposed action, including all proposed activities</b>	
<p>The proposed action is the Bowmans Creek Windfarm (the Project). The Proponent for the Project is Epuron Projects Pty Ltd (Epuron), which is the entity proposing to take the proposed action.</p> <p>The Project is located approximately 10 km east of Muswellbrook and 185 km north of Sydney, in the Hunter Valley of NSW. The Project is located within three Local Government Areas (LGA); Muswellbrook LGA, Singleton LGA and Upper Hunter Shire LGA. Wind turbines will be primarily located within the Muswellbrook LGA and Singleton LGA, with a small number also located in the Upper Hunter Shire LGA</p> <p>The Project will generally involve the construction, operation, maintenance and decommissioning of the Bowmans Creek Wind Farm including (at least).</p> <ul style="list-style-type: none"><li>• Up to 80 wind turbines consisting of:<ul style="list-style-type: none"><li>o A three-blade rotor mounted onto a tubular tower with a combined height (blade plus tower) to tip not exceeding 220 m;</li><li>o Crane hardstand area; and</li><li>o Turbine laydown area;</li></ul></li><li>• Electrical infrastructure:<ul style="list-style-type: none"><li>o Collector substations and associated transmission lines to transmit the generated electricity into the existing high voltage network;</li><li>o Connections between the wind turbines and the collector substation/s, which will include a combination of underground cables and overhead powerlines;</li></ul></li><li>• Ancillary infrastructure;<ul style="list-style-type: none"><li>o Operation and Maintenance Facility (O&amp;M Facility);</li><li>o Storage facilities and laydown areas;</li><li>o Unsealed access tracks within the Project Boundary;</li><li>o Ongoing use of two existing wind monitoring masts and installation of additional monitoring masts;</li><li>o Temporary construction facilities (including concrete batching plant and rock crushing facilities);</li></ul></li><li>• Minor upgrades to the local road network to facilitate delivery of oversized loads (such as wind turbine components) to the site;</li><li>• Administrative activities (including boundary adjustments and subdivisions).</li></ul> <p>Additionally, and external to the Project Boundary, an underground powerline adjacent to a small section of Albano Road, a transmission line from the Project to the existing Ausgrid or TransGrid electricity networks (options shown to be confirmed in EIS), and small sections where road widening of minor public roads will be required to allow access for construction of the turbines are included.</p>	
<b>1.3 What is the extent and location of your proposed action?</b>	
See Appendix B	
<b>1.5 Provide a brief physical description of the property on which the proposed action will take place and the location of the proposed action (e.g. proximity to major towns, or for off-shore actions, shortest distance to mainland)</b>	
<p>The Project is located primarily on freehold land within and adjacent to agricultural areas. The Project is entirely proposed on land zoned RU1 – Primary Production under the Muswellbrook Local Environment Plan (LEP) 2009, Singleton LEP 2013 and Upper Hunter LEP 2013. There are a number of small parcels of Crown Land within the Project Boundary. The closest regional town to the Project Boundary is Muswellbrook, located approximately 10 km east. Small rural communities in proximity to the Project include Hebden, Muscle Creek, McCully's Gap, Rouchel Brook, Bowmans Creek and Goorangoola.</p> <p>The New England Highway provides the main road access into the Hunter Valley and is located approximately 9 km south of the Project Boundary at its closest point. The region supports a number of active coal mines and two coal fired power stations (Bayswater and Liddell). The majority of land within the Project Boundary is cleared for agriculture and used extensively for commercial cattle grazing.</p>	
<b>1.6 What is the size of the proposed action area development footprint (or work area) including disturbance footprint and avoidance footprint (if relevant)?</b>	
<p>The land within the Project Boundary is approximately 16,527 hectares (ha) in size. Additionally, and external to the Project Boundary, is an underground powerline adjacent to a small section of Albano Road, a transmission line from the Project to the existing Ausgrid or TransGrid electricity network, and small sections where road widening of minor public roads will be</p>	

Note: PDF may contain fields not relevant to your application. These fields will appear blank or unticked. Please disregard these fields.

required to allow access for construction of the turbines.

The development footprint (Study Area) is shown in Appendix A Figure 2 and incorporates buffers around Project components (including turbine locations to allow for micro-siting and design refinement).

The maximum disturbance footprint within the Study Area (plus the disturbance for road upgrades) is less than 400 ha.

**1.7 Proposed action location**

Address - Albano Road, Bowmans Creek, NSW, 2330, Australia

**1.8 Primary jurisdiction**

New South Wales

**1.9 Has the person proposing to take the action received any Australian Government grant funding to undertake this project?**

Yes  No

**1.10 Is the proposed action subject to local government planning approval?**

Yes  No

**1.11 Provide an estimated start and estimated end date for the proposed action**

Start Date	01/07/2021
End Date	01/07/2081

**1.12 Provide details of the context, planning framework and state and/or local Government requirements**

The Project will be assessed as State Significant Development (SSD) under Division 4.7 of Part 4 of the Environmental Planning and Assessment Act 1979 (EP&A Act) and will be supported by an Environmental Impact Statement (EIS).

The EIS will be prepared in accordance with the issued Secretary's Environmental Assessment Requirements (SEARs) dated 4 July 2019. When the EIS is complete, it will be lodged with the NSW Department of Planning, Industry and Environment (DPIE) as part of a development application in respect of the Project. A public exhibition period will follow with the opportunity for public submissions to be made. Epuron will then respond to those submissions. The Secretary will then prepare a report on the application and provide it to the Minister who may refer the application to the Independent Planning Commission (IPCN). The determining authority for SSD is the Minister for Planning and Public Spaces, unless referred to the IPCN.

If development consent for the Project is granted under Part 4, Division 4.1 of the EP&A Act, several other approvals which would ordinarily be required under NSW legislation in respect of the Project will either not be required or must be issued in terms consistent with the development consent.

The principal other approvals and authorisations which are (or are likely to be) required under NSW legislation in addition to development consent under the EP&A Act include:

- Water access licences under the Water Management Act 2000 NSW (WM Act);
- Application for an Environment Protection Licence under the Protection of the Environment Operations Act 1997

NSW;

- Work in or over a public road approval under the Roads Act 1993;
- Approval for works over Crown Land under the Crowns Land Management Act 2016;
- Bushfire Management Plan under Rural Fires Act 1997;
- Construction Certificates and Building Certificates under the EP&A Act; and
- Management plans and other conditions of development consent.

As discussed in Section 2 below, it is considered that the proposed action will have or is likely to have a "significant impact" on "matters of national environmental significance" under the Environment and Protection Biodiversity Conservation Act 1999 (EPBC Act).

Note: PDF may contain fields not relevant to your application. These fields will appear blank or unticked. Please disregard these fields.

**1.13 Describe any public consultation that has been, is being or will be undertaken, including with Indigenous stakeholders**

General Consultation

Epuron has developed a comprehensive Stakeholder Engagement Plan for the proposed action which builds on its existing best practice stakeholder engagement. The purpose of the Stakeholder Engagement Plan is to ensure that an appropriate, methodical process is applied to the identification of and engagement with all identified stakeholders for the Project.

As a component of the Stakeholder Engagement Plan, consultation with the community has commenced. This consultation has included the following:

- Formation of a Community Consultative Committee (first meeting planned for mid-2020)
- A community meeting held by Muswellbrook Shire Council in July 2018
- Two rounds of community information sessions held in 2018 and 2019 at McCully's Gap, Hebden, Mount Pleasant and Muscle Creek
- Release of four project newsletters to date
- Numerous introductory letters, face to face meetings including phone calls and emails with a wide range of community stakeholders and landowners
- A project website <https://epuron.com.au/news/?project=bowmans-creek>

Engagement with the local community will continue to be undertaken for the Project (incorporating the proposed action) during preparation of the EIS, with all relevant issues addressed as required. Information gathered during community engagement will assist in informing Project planning and developing appropriate management and mitigation strategies to address issues of concern and relevance to the local community. It is Epuron's intention to continue consultation efforts with relevant stakeholders following granting of approvals and consents in order to maintain its established relationships.

Indigenous Community Consultation

Consultation with Indigenous stakeholders has commenced as part of the Aboriginal Cultural Heritage Assessment Report (ACHAR) for the EIS in accordance with the 'Aboriginal cultural heritage consultation requirements for proponents 2010'.

Epuron will follow the consultation requirements outlined in the 'Aboriginal cultural heritage consultation requirements for proponents 2010' by which Aboriginal stakeholders will have the opportunity to comment on and participate in certain aspects of the EIS

**1.14 Describe any environmental impact assessments that have been or will be carried out under Commonwealth, State or Territory legislation including relevant impacts of the project**

The proposed action will be the subject of an EIS prepared in accordance with the:

- a. provisions of the EP&A Act; and
- b. requirements of the Secretary's Environmental Assessment Requirements (SEARs).

The EIS will address technical fields including:

- Landscape and Visual
- Noise and Vibration
- Biodiversity
- Traffic and Transport
- Hazard and Risk
- Heritage
- Socio-economics

Other environmental assessments including water, soils and waste will also be undertaken for the Project.

As discussed in Section 1.13, consultation with the community has been initiated and will continue to be undertaken during the preparation of the EIS

**1.15 Is this action part of a staged development (or a component of a larger project)?**

- Yes       No

**1.16 Is the proposed action related to other actions or proposals in the region?**

- Yes       No

Note: PDF may contain fields not relevant to your application. These fields will appear blank or unticked. Please disregard these fields.

## Section 2

### Matters of national environmental significance

2.1 Is the proposed action likely to have any direct or indirect impact on the values of any World Heritage properties?

Yes  No

2.2 Is the proposed action likely to have any direct or indirect impact on the values of any National Heritage places?

Yes  No

2.3 Is the proposed action likely to have any direct or indirect impact on the ecological character of a Ramsar wetland?

Yes  No

2.4 Is the proposed action likely to have any direct or indirect impact on the members of any listed species or any threatened ecological community, or their habitat?

Yes  No

### Species or threatened ecological community

- White Box - Yellow Box - Blakely's Red Gum Grassy Woodland and Derived Native Grassland (Critically Endangered)
- Central Hunter Valley Eucalypt Forest and Woodland (Critically Endangered)
- Regent Honeyeater (*Anthochaera phrygia*) – Critically Endangered
- Swift Parrot (*Lathamus discolor*) – Critically Endangered
- Spotted-tailed quoll (*Dasyurus maculatus*) – Endangered
- Large-eared Pied Bat (*Chalinolobus dwyeri*) - Vulnerable
- Koala (*Phascolarctos cinereus*) - Vulnerable

### Impact

#### Vegetation Communities

The proposed action will result in the removal of approximately 178 ha of White Box - Yellow Box - Blakely's Red Gum Grassy Woodland and Derived Native Grassland (~35 ha in woodland form and ~143 ha in derived grassland form) and approximately 33 ha of Central Hunter Valley Eucalypt Forest and Woodland from within the disturbance footprint. The likelihood that the proposed action would have a significant impact on these CEECs has been considered in accordance with the Significant Impact Criteria for a CEEC, as outlined in the Department's Significant Impact Guidelines (DoE, 2013). Clearing of approximately 178 ha of White Box - Yellow Box - Blakely's Red Gum Grassy Woodland and Derived Native Grassland and approximately 33 ha of Central Hunter Valley Eucalypt Forest and Woodland each trigger one of the seven impact criteria listed in the guidelines: 'reduce the extent of an ecological community'.

Further details are provided in Attachment 1 Table 1 – Significant Impact Guideline Assessments

#### Fauna

The proposed action will result in the removal of approximately 71 ha of potential foraging habitat for the Regent Honeyeater. The site does not occur within known breeding areas of NSW and therefore breeding habitat will not be cleared. However, limited foraging habitat for this species is present in the form of scattered occurrences of key eucalypt species such as Yellow Box. The significance of the impact on the species is considered to be minimal as the Referral Area provides minimal foraging and roosting opportunities. Following consideration of the Significant Impact Guidelines (DoE, 2013), the proposed action is considered unlikely to significantly impact on the Regent Honeyeater.

The proposed action will result in the removal of approximately 72.5 ha of potential foraging habitat for the Swift Parrot. The significance of the impact on the species is considered to be minimal as the Referral Area provides minimal foraging and roosting opportunities due to proportionately limited occurrence of favoured feed trees such as Spotted Gum and Grey Box.

Note: PDF may contain fields not relevant to your application. These fields will appear blank or unticked. Please disregard these fields.

Following consideration of the Significant Impact Guidelines (DoE, 2013), the proposed action is considered unlikely to significantly impact on the Swift Parrot.

The proposed action will result in the removal of approximately 101.41 ha of potential foraging and breeding habitat for the Spotted-tailed quoll. The significance of the impact on the species is considered to be minimal as the Referral Area provides minimal foraging and breeding opportunities. Following consideration of the Significant Impact Guidelines (DoE, 2013), the proposed action is considered unlikely to significantly impact on the Spotted-tailed quoll.

The proposed action will result in the removal of approximately 57.42 ha of potential foraging habitat for Large-eared Pied Bat. No breeding or roosting habitat will be removed. The significance of the impact on the species is considered to be minimal as the Referral Area provides limited foraging opportunities. Following consideration of the Significant Impact Guidelines (DoE, 2013), the proposed action is considered unlikely to significantly impact on the Large-eared Pied Bat.

The proposed action may result in the removal of scattered Yellow Box (*Eucalyptus melliodora*), Grey Box (*Eucalyptus moluccana*), Grey Gum (*Eucalyptus biturbinata*) and Large-fruited grey gum (*Eucalyptus canaliculata*) trees, which represent secondary food trees as well as Thin-leaved stringybark (*Eucalyptus eugenioides*) which represents a supplementary food tree for koalas. No primary food tree species have been recorded within the disturbance footprint. No mature eucalypt forest will be removed therefore no breeding habitat will be removed. The significance of the impact on the species is considered to be minimal as the Referral Area provides minimal foraging opportunities. Following consideration of the Significant Impact Guidelines (DoE, 2013), the proposed action is considered unlikely to significantly impact on the Koala

Further details for each species are provided in Attachment 1 Table 2 and Table 3 – Significant Impact Guideline Assessments

**2.4.2 Do you consider this impact to be significant?**

Yes  No

**2.5 Is the proposed action likely to have any direct or indirect impact on the members of any listed migratory species or their habitat?**

Yes  No

**Migratory species**

- White-throated Needletail (*Hirundapus caudacutus*)
- White-bellied Sea Eagle (*Haliaeetus leucogaster*)

**Impact**

White-throated Needletail (*Hirundapus caudacutus*) – This species is almost exclusively aerial in Australia and is potentially susceptible to blade strike due to its aerial behaviour. The extent of this impact is to be determined by the results of full site survey and habitat modelling

White-bellied Sea Eagle (*Haliaeetus leucogaster*) – This species, as is the case with other raptors, is considered at greater risk of collision/blade strike because of their flight heights, size and behaviour.

Following consideration of the Significant Impact Guidelines (DoE, 2013), the proposed action is considered unlikely to significantly impact on these two migratory species.

Further details are provided in Attachment 1 Table 4 – Significant Impact Guideline Assessments

**2.5.2 Do you consider this impact to be significant?**

Yes  No

**2.6 Is the proposed action to be undertaken in a marine environment (outside Commonwealth marine areas)?**

Yes  No

**2.7 Is the proposed action likely to be taken on or near Commonwealth land?**

Yes  No

Note: PDF may contain fields not relevant to your application. These fields will appear blank or unticked. Please disregard these fields.

<b>2.8 Is the proposed action taking place in the Great Barrier Reef Marine Park?</b> <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
<b>2.9 Is the proposed action likely to have any direct or indirect impact on a water resource from coal seam gas or large coal mining development?</b> <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
<b>2.10 Is the proposed action a nuclear action?</b> <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
<b>2.11 Is the proposed action to be taken by a Commonwealth agency?</b> <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
<b>2.12 Is the proposed action to be undertaken in a Commonwealth Heritage place overseas?</b> <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
<b>2.13 Is the proposed action likely to have any direct or indirect impact on any part of the environment in the Commonwealth marine area?</b> <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No

Note: PDF may contain fields not relevant to your application. These fields will appear blank or unticked. Please disregard these fields.

## Section 3

### Description of the project area

#### 3.1 Describe the flora and fauna relevant to the project area

Due to the diversity of habitats present in the locality (defined as the area within 20 km from the central parts of the Study Area), a range of flora and fauna species have potential to occur within the Study Area.

Flora: The Referral Area largely supports relatively young regrowth woody vegetation containing a relatively low diversity of native species or grassland areas (exotic and derived native) due mostly to widespread degradation caused by past land clearance and grazing.

The generated PMST report indicates that there are 14 threatened flora species (or their habitats thereof) likely to occur in the locality of the Referral Area. An assessment of the likelihood of occurrence of EPBC listed threatened flora species is provided in Attachment 2 – Likelihood of Occurrence.

No EPBC Act listed threatened flora species have been recorded during field surveys conducted to date within the Referral Area/Study Area. However, as conditions during survey were affected by prevailing drought conditions in NSW, as a precautionary measure, potential habitat for *Thesium australe* is still considered to be present. The potential presence, if any, of these species within potential habitats in the Study Area if any, on site will be confirmed through further field survey (e.g. pre-clearance surveys) and where possible it will be avoided.

Fauna: Extensive historical clearing and agricultural land uses have converted much of the land within the Study Area. Current land uses have simplified and/or removed the majority of ground habitat features such as logs and rocks from the Study Area.

Grassland habitat across the Referral Area comprises a mix of exotic/cultivated areas and derived native grasslands with varied native species diversity. Some areas of derived native grassland are heavily grazed with limited understory cover whereas other areas have relatively denser groundcover due to lower grazing pressure. Woodland vegetation within the Referral Area largely consists of bands of young and/or regrowth vegetation along steep ridges. A large proportion of the trees in the woodlands comprise either individuals that are too young to form hollows or comprise species that generally have limited hollows (e.g. Ironbarks). However, scattered old trees with hollows have been recorded within the Referral Area. Despite its modified nature, the woodland areas within the Referral Area still offer some broad habitat features for native fauna, including threatened species. The generated PMST report indicates that there are 25 threatened fauna species with potential to occur in the locality of the Referral area. An assessment of the likelihood of occurrence for threatened fauna species is provided in Attachment 2 – Likelihood of Occurrence. Surveys conducted by Cumberland Ecology detected potential calls of the Large-eared Pied Bat at four locations which are currently awaiting specialist confirmation. The locations of these potential recordings as well as known records for threatened species as per the NSW Bionet Atlas are shown in Figure 4

The following threatened species are known to occur/considered to have potential to occur based on a combination of known records, available habitat, migratory behaviour and/or mobility of the species: Regent Honeyeater; Swift Parrot; Spotted-tailed Quoll; Large-eared Pied Bat; and Koala.

Subsequent to careful consideration of the Significant Impact Guidelines (DoE, 2013), the proposed action is considered unlikely to significantly impact on any of the five threatened fauna species (Attachment 1 – Significant Impact Guideline Assessments)

#### 3.2 Describe the hydrology relevant to the project area (including water flows)

The Project is located with the Hunter River catchment, specifically within the sub-catchments that drain to Bowmans Creek, Sandy Creek and Muscle Creek.

The majority of the Project Boundary is located within the catchment of Bowmans Creek. It is a sixth order stream that exhibits near perennial flow. The headwaters of Bowmans Creek are located in the Mt Royal Range and the upper catchment is deeply incised in steep bedrock terrain. The lower reaches of Bowmans Creek meander through a broad alluvial floodplain and terrace sequence that is up to 1 km wide. Bowmans Creek has its confluence with the Hunter River to the south of the Project. The named tributaries of Bowmans Creek located within the Project Boundary include Cedar Creek, Fish Hole Creek, Lincolns Creek and Alexander Creek.

The northern portion of the Project Boundary is located within the catchment of Sandy Creek. Sandy Creek is an ephemeral stream (i.e. it flows only following high rainfall). The main channel meanders in a generally east-west orientation and has its confluence with the Hunter River near Muswellbrook. The named tributaries of Sandy Creek within the Project Boundary include Limestone Creek, Stringybark Creek and Gins Creek.

A small area within the western portion of the Project Boundary is located within the catchment of Muscle Creek. This is an ephemeral stream that meanders in a generally east-west orientation and meets the Hunter River at Muswellbrook. Only the uppermost reaches of Muscle Creek and its tributary Middle Creek are located within the Project Boundary.

There are no significant wetlands located in the vicinity of the Project Boundary. Lake St Clair, Lake Liddell and Lake Glenbawn are located within approximately 10 km from the site (Ecosure, 2018).

Note: PDF may contain fields not relevant to your application. These fields will appear blank or unticked. Please disregard these fields.

### 3.3 Describe the soil and vegetation characteristics relevant to the project area

#### Soil

The Project is located within three IBRA subregions: Upper Hunter, Tomalla and Ellerston (Ecosure, 2018).

The Project Boundary includes two Mitchell landscape units:

- Scone – Gloucester Foothills unit is characterised by thin stony loams and red brown to yellow texture contrast soils with harsh subsoils in valleys; and
- Manning Great Escarpment Southern Aspect unit is characterised by shallow brown earths grading to brown texture-contrast soils on lower slopes. There are thin stony profiles on steep slopes, yellow texture-contrast soils on high river terraces (Ecosure, 2018).

#### Vegetation

The disturbance footprint is approximately 350 ha in size and consists of a mosaic of woodland vegetation, derived native grasslands, exotic/cultivated grasslands and disturbed areas (existing infrastructure). As Wind Farm developments generally allow for micro siting of final turbine locations, a larger area of vegetation (~1200 ha) has been surveyed and/or mapped (defined as the Study Area) to allow for maximum feasible avoidance of MNES within the limits of other non-ecological constraints.

The Study Area contains approximately 800 ha of native vegetation in the form of patches of forest and woodland (in various stages of regeneration) among derived native grassland. Forest and woodland vegetation comprise a mix of Dry Rainforest, Dry Sclerophyll forests, Wet Sclerophyll forests and Grassy Woodlands on hillslopes and ridges. Areas of proposed access tracks in the flats between ridgelines comprise a mix of grasslands (exotic pasture and derived native grasslands) and riparian vegetation along narrow creek lines. The status of the various vegetation communities is described in more detail in Section 3.5

### 3.4 Describe any outstanding natural features and/or any other important or unique values relevant to the project area

There are no outstanding natural features located within the Project Boundary. The Mount Royal and Barrington Tops National Parks are located north-east of the Project. The Lake Glenbawn Water Supply Reserve is located north of the Project. The Project will not affect these reserves

### 3.5 Describe the status of native vegetation relevant to the project area

The disturbance footprint is approximately 350 ha in size, which includes 245 ha of native vegetation and 105 ha of exotic grassland and cleared land. The wider Study Area includes approximately 800 ha of native vegetation and 420ha of exotic grassland and cleared areas.

The extent of vegetation within the disturbance footprint and Study Area has been determined through review of previous mapping, aerial photograph interpretation and field surveys. The vegetation community nomenclature utilised for the vegetation mapping comprises Plant Community Types (PCTs) as listed in the NSW BioNet Vegetation classification.

The following vegetation communities or PCTs have been mapped within the Project Boundary and Study Area (Figure 2).

- 84 - River Oak - Rough-barked Apple - red gum - box riparian tall woodland (wetland) of the Brigalow Belt South Bioregion and Nandewar Bioregion

- 484 - Derived tall spear grass Plains Grass grassland on mainly basalt hills of the Liverpool Plains, Liverpool Range and in the upper Hunter Valley (Merriwa district), south-eastern Brigalow Belt South Bioregion

- 485: River Oak riparian grassy tall woodland of the western Hunter Valley

- 541 - Silvertop Stringybark - Rough-barked Apple grassy open forest of southern Nandewar Bioregion, southern New England Tableland Bioregion and NSW North Coast Bioregion

- 796: Derived grassland of the NSW South Western Slopes

- 1207 - Spotted Gum - Broad-leaved Ironbark grassy open forest of dry hills of the lower Hunter Valley, Sydney Basin Bioregion

- 1213 - Spotted Gum - Grey Ironbark forest dry open forest of the lower foothills of the Barrington Tops, NSW North Coast Bioregion

- 1525: Sandpaper Fig - Whalebone Tree warm temperate rainforest

- 1541: Whalebone Tree - Red Kamala dry subtropical rainforest of the lower Hunter River

- 1543 - Rusty Fig - Native Quince - Native Olive dry rainforest of the Central Hunter Valley

- 1546: Sydney Blue Gum - Silvertop Stringybark grassy open forest on ranges of the lower North Coast

- 1554: Messmate - Silvertop Stringybark - Tussock Grass shrub - grass open forest of western Barrington Tops

- 1583: Thin-leaved Stringybark - Grey Gum - Broad-leaved Apple shrub - grass tall open forest on ranges of the

lower North Coast

- 1584: White Mahogany - Spotted Gum - Grey Myrtle semi-mesic shrubby open forest of the central and lower

Hunter Valley

- 1598 - Forest Red Gum grassy open forest on floodplains of the lower Hunter

- 1602: Spotted Gum - Narrow-leaved Ironbark shrub - grass open forest of the central and lower Hunter

- 1604: Narrow-leaved Ironbark - Grey Box - Spotted Gum shrub - grass woodland of the central and lower Hunter;

- 1605: Narrow-leaved Ironbark - Native Olive shrubby open forest of the central and upper Hunter;

- 1606: White Box - Narrow-leaved Ironbark - Blakely's Red Gum shrubby open forest of the central and upper Hunter

Note: PDF may contain fields not relevant to your application. These fields will appear blank or unticked. Please disregard these fields.

- 1607: Blakely's Red Gum - Narrow-leaved Ironbark - Rough-barked Apple shrubby woodland of the upper Hunter
- 1608: Grey Box - Grey Gum - Rough-barked Apple - Blakely's Red Gum grassy open forest of the central Hunter;
- 1617 - New England Blackbutt - Diehard Stringybark shrubby open forest on the Northern Tablelands escarpment and Barrington Tops
- 1683: Silvertop Stringybark - Tussock Grass grassy open forest of the Northern Tablelands escarpment and Barrington Tops,
- 1691 - Narrow-leaved Ironbark - Grey Box grassy woodland of the central and upper Hunter
- 1693 - Yellow Box - Rough-barked Apple grassy woodland of the upper Hunter and Liverpool Plains
- 1695 - Yellow Box grassy woodland on basalt soils of the upper Hunter,
- 1895 - Sydney Hinterland Grey Myrtle Dry Rainforest

Additional mapped communities and habitats that have not been assigned to a PCT include Exotic/Cultivated areas and Farm Dams.

PCTs 796, 1606, 1608, 1691, 1693 and 1695 conform to the EPBC Act listed CEEC White Box - Yellow Box - Blakely's Red Gum Grassy Woodland and Derived Native Grassland. Of these only 796, 1606 and 1608 occur within the Study Area.

PCTs 1602, 1604 and 1605 conform to the EPBC Act listed CEEC Central Hunter Valley Eucalypt Forest and Woodland. All three PCTs are present within the Study Area.

PCTs 796, 1525, 1541, 1543, 1602, 1604, 1605, 1606, 1608, 1691, 1693, 1695 conform to various threatened communities as listed under the NSW Biodiversity Conservation Act 2016 (BC Act) (see Appendix A Attachment 3). The remaining native vegetation communities, do not conform to any listed threatened community under the BC Act or EPBC Act.

The impacted areas of vegetation communities that conform to the definition of vegetation communities listed under the EPBC Act are shown in Figure 3.

### 3.6 Describe the gradient (or depth range if action is to be taken in a marine area) relevant to the project area

The topography within the Project Boundary is characterised by a series of ridges running north-south with moderate to steep slopes. The elevation within the Project Boundary ranges from approximately Reduced Level (RL) 141 m to 794 m.

### 3.7 Describe the current condition of the environment relevant to the project area

Historic and current land uses have led to the modification of the environment within the Referral Area, particularly along the valleys between ridgelines. The Referral Area currently comprises a mosaic of agricultural/grazing lands, existing infrastructure (roads and tracks) and remnant/regrowth vegetation.

The agricultural/grazing lands have been extensively cleared of vegetation which has resulted in a significant loss of flora and fauna habitats. Exotic flora species have been introduced within these areas, some of which have spread into adjacent remnant vegetation. Feral animals such as foxes and rabbits have been recorded within these areas. Good condition vegetation is typically associated with the slopes and ridgelines which have not been used for agriculture or grazing. However, these areas also show signs of historic clearing and grazing.

Despite its modified nature, the land within the Project Boundary still offers some broad habitat features for native flora and fauna. Native vegetation occurs in the form of Dry rainforest, dry sclerophyll forest, wet sclerophyll forest and grassy woodlands including habitat features such as foraging, shelter and limited breeding resources. However, poor connectivity to large patches between ridges due to existing land uses limits the dispersal of less mobile species.

### 3.8 Describe any Commonwealth Heritage places or other places recognised as having heritage values relevant to the project

None

### 3.9 Describe any Indigenous heritage values relevant to the project area

The Project Boundary is located in the border country of the Wonnarua, Geawegal and Kamilaroi tribal areas of the upper Hunter River Valley.

A search of the Heritage NSW administered Aboriginal Heritage Information Management System (AHIMS) database on 27 September 2019 returned two sites, 37-3-0048 and 37-3-0049 within the Project Boundary, with one site, 37-3-0047 in close proximity. A comprehensive Aboriginal and Cultural Heritage Assessment Report (ACHAR) is being prepared for the Project.

As discussed in Section 1.13, consultation will be undertaken in accordance with the 'Aboriginal Cultural Heritage Consultation Requirements for Proponents 2010' (DECCW 2010).

### 3.10 Describe the tenure of the action area (e.g. freehold, leasehold) relevant to the project area

The land within the Project Boundary is primarily freehold and is entirely within land zoned RU1 – Primary Production under the Muswellbrook Local Environment Plan (LEP) 2009, Singleton LEP 2013 and Upper Hunter LEP 2013. There are a number of small parcels of Crown Land within the Project Boundary.

### 3.11 Describe any existing or any proposed uses relevant to the project area

Note: PDF may contain fields not relevant to your application. These fields will appear blank or unticked. Please disregard these fields.

The majority of land within the Project Boundary is cleared for agriculture and used extensively for commercial cattle grazing. There are patches of timber to varying degrees, heavy to light timbered areas.

Note: PDF may contain fields not relevant to your application. These fields will appear blank or unticked. Please disregard these fields.

## Section 4

### Measures to avoid or reduce impacts

#### 4.1 Describe the measures you will undertake to avoid or reduce impact from your proposed action

**Ecology:**The key approach proposed to minimise impacts on MNES will be avoidance of impacts. Turbines and infrastructure will, wherever possible, be located to avoid species and communities listed under the EPBC Act as well as non-listed species such as raptors, in particular the Wedge-tailed Eagle. The disturbance footprint is approximately 350 ha in size and is described in Section 3. As Wind Farm developments generally allow for micro siting of final turbine locations, a larger area of vegetation has been surveyed and mapped (defined as the Study Area) to allow for maximum feasible avoidance of MNES within the limits of other non-ecological constraints. MNES, in particular areas of Box Gum Woodland and Central Hunter Forest and Woodland will be avoided to the maximum extent feasible during the final micro siting process.

The requisite access tracks have been aligned with existing tracks and exotic areas wherever feasible to avoid clearing of native vegetation and heritage values. Surveys have focused on detecting locations of raptor nests and hollow-bearing trees in order for turbines to be placed at a suitable buffer distance from these habitat features. Where impacts cannot be avoided, management measures, including but not limited to the following, will be implemented to ensure that ongoing impacts are minimised as far as reasonable

Management Plans will be prepared to manage the environmental impacts associated with the clearing of native vegetation and will include:

- Inductions of staff/contractors;
- Vegetation clearing and fauna rescue/relocation protocols;
- Fauna habitat salvage (where feasible);
- Weed management;
- Pest animal management;
- Monitoring and adaptive management; and
- Removal of any carcasses associated with calving or lambing activities on the property to an appropriate facility to reduce prey numbers for raptors in proximity of turbines.

Any residual impacts after all avoidance and mitigation measures have been considered will be compensated for by provision of suitable offsets.

**Water:** The Project has been designed to minimise the impacts of the proposed infrastructure on the local hydrology. Other than the main channels of Bowmans Creek and Sandy Creek, the streams present within the Project Boundary are mostly minor gullies and drainage lines. The proposed turbine locations will avoid 'waterfront land' as far as practicable. 'Waterfront land' is defined under the Water Management Act 2000 (NSW) and includes stream beds and land within 40 m of stream banks. The proposed turbines will be set back a significant distance from Bowmans Creek and Sandy Creek. If development on waterfront land associated with minor drainage lines is not avoidable, it will be undertaken in accordance with the 'Guidelines for Controlled Activities on Waterfront Land' (NSW Department of Industry, 2018)(Controlled Activity Guidelines).

The Project will involve the construction of linear infrastructure such as powerlines, underground electrical cables and access tracks. This infrastructure will need to traverse some creeks and drainage lines. The following measures will minimise the potential impacts of the Project on streams:

- Existing access tracks will be used wherever practicable;
- Access tracks will cross Sandy Creek and Bowmans Creek near their headwaters;
- Overhead powerlines will be utilised for stream crossings(where practicable)due to their ability to span across waterfront land;
- The underground cable crossing beneath Bowmans Creek will be located at the existing bridge along Bowmans Creek Road. Alternatively, an overhead powerline may cross Bowmans Creek; and
- Creek crossings will be developed in accordance with the Controlled Activities Guidelines.

The most significant environmental hazards will arise during the construction phase of the Project. Potential impacts to streams may arise as a result of ground disturbance, earthworks, vehicle movements and uncontrolled spills. To minimise the risk of environmental harm, the following measures will be implemented during the construction phase:

- Utilise existing access tracks wherever practicable;
- Stage construction activities so the total disturbed area at any one time is reduced;
- Rehabilitation of disturbed areas as soon as practicable;
- Siting of soil stockpiles as far away as practicable;
- Implementation of erosion and sediment controls in accordance with 'Managing Urban Stormwater: Soils and Construction' (Landcom, 2004);
- Siting of concrete batching plants away from watercourses and implementation of bunding to minimise the risk of spills;
- Storage of fuels, oils and other hazardous materials away from watercourses and implementation of suitable bunding;
- Implementation of a spill response protocol (in the event of uncontrolled spills of hazardous substances); and
- Preparation of a Construction Management Plan outlining the aforementioned management measures.

Note: PDF may contain fields not relevant to your application. These fields will appear blank or unticked. Please disregard these fields.

**4.2 For matters protected by the EPBC Act that may be affected by the proposed action, describe the proposed environmental outcomes to be achieved**

Ecology

Environmental outcomes will include retention of TEC, if present within the project area, to the greatest extent possible. Operational and land management changes will potentially result in an improvement in the condition of the TEC.

Habitat for threatened species will be protected wherever possible and surveys for threatened plants, in particular, will inform the location of works and will minimise impact areas.

Infrastructure will be located to avoid habitats and areas otherwise used by threatened species

Water

The Project has been designed to achieve the following outcomes:

- Minimise total surface disturbance;
- Constrain infrastructure crossings of streams to low order tributaries;
- Minimise development within waterfront land (i.e. within 40 m of stream banks); and
- Siting of large-scale infrastructure (wind turbines, substations etc.) away from streams.

Appropriate environmental controls will be implemented during the construction phase to achieve the following outcomes:

- Minimise total surface disturbance;
- Minimise erosion of soil from exposed areas and soil stockpiles; and
- Minimise risk of uncontrolled spills and contamination of watercourses.

Note: PDF may contain fields not relevant to your application. These fields will appear blank or unticked. Please disregard these fields.

## Section 5

### Conclusion on the likelihood of significant impacts

#### 5.1 You indicated the below ticked items to be of significant impact and therefore you consider the action to be a controlled action

- World Heritage properties
- National Heritage places
- Wetlands of international importance (declared Ramsar wetlands)
- Listed threatened species or any threatened ecological community
- Listed migratory species
- Marine environment outside Commonwealth marine areas
- Protection of the environment from actions involving Commonwealth land
- Great Barrier Reef Marine Park
- A water resource, in relation to coal seam gas development and large coal mining development
- Protection of the environment from nuclear actions
- Protection of the environment from Commonwealth actions
- Commonwealth Heritage places overseas
- Commonwealth marine areas

#### 5.2 If no significant matters are identified, provide the key reasons why you think the proposed action is not likely to have a significant impact on a matter protected under the EPBC Act and therefore not a controlled action

N/A – have listed controlled action due to impact on CEECs. Note that significant impacts (and therefore controlled action) is for Threatened Ecological Communities only. Impacts on threatened species are not considered to be significant.

Note: PDF may contain fields not relevant to your application. These fields will appear blank or unticked. Please disregard these fields.

## Section 6

### Environmental record of the person proposing to take the action

#### 6.1 Does the person taking the action have a satisfactory record of responsible environmental management? Explain in further detail

Epuron has a proven history of best practice environmental management, which will continue to be implemented for the proposed action. Epuron is a leading Australian renewable energy company with a focus on development of utility-scale wind and solar energy and has been developing projects in NSW since 2003. Epuron has a successful track record in developing wind farms including the Liverpool Range, Coppabella, Rye Park and White Rock Wind Farm. The Cullerin Range Wind Farm, Gullen Range, White Rock and Silverton Wind Farm are now in operation.

Epuron is a founding signatory to the Clean Energy Council's Best Practice Charter for Renewable Energy Developments and commit to honoring the Charter in the Project. The Charter outlines a commitment by signatories to engage respectfully with the communities in which they plan and operate projects, to be sensitive to environmental and cultural values and to make a positive contribution to the regions in which they operate.

#### 6.2 Provide details of any past or present proceedings under a Commonwealth, State or Territory law for the protection of the environment or the conservation and sustainable use of natural resources against either (a) the person proposing to take the action or, (b) if a permit has been applied for in relation to the action – the person making the application

- a) None
- b) None

#### 6.3 If it is a corporation undertaking the action will the action be taken in accordance with the corporation's environmental policy and framework?

Yes  No

#### 6.3.1 If the person taking the action is a corporation, provide details of the corporation's environmental policy and planning framework

The proposed wind farm would be developed with project specific Environmental Management Plans as per the Statement of Commitments included in the EIS. The action would be undertaken in accordance with stringent environmental management plans and regular monitoring would occur to ensure that impacts are minimised or managed.

#### 6.4 Has the person taking the action previously referred an action under the EPBC Act, or been responsible for undertaking an action referred under the EPBC Act?

Yes  No

#### 6.4.1 EPBC Act No and/or Name of Proposal

Yes

- Liverpool Range Wind Farm (EPBC 2014/7136)
- White Rock Wind Farm (EPBC 2011/5854)
- Silverton Wind Farm (EPBC 2009/4847)
- Gullen Range Wind Farm (EPBC 2008/3947)
- Conroys Gap Wind Farm (EPBC 2006/2733)
- Cullerin Range Wind Farm (EPBC 2006/2687)

None of these projects have been determined controlled actions.

Note: PDF may contain fields not relevant to your application. These fields will appear blank or unticked. Please disregard these fields.

## Section 7

### Information sources

#### Reference source

Ecosure (2018). Bowmans Creek Wind Farm Desktop Assessment  
NSW State Vegetation Type Map: Upper Hunter v1.0. VIS\_ID 4894  
NSW BioNet Atlas Records for threatened species

#### Reliability

Ecosure Desktop Assessment - This is a high-level desktop assessment to inform future surveys.  
NSW State Vegetation Type Map: Upper Hunter v1.0. VIS\_ID 4894 - This comprises broad-scale desktop mapping with limited ground survey and therefore was refined/updated during field surveys  
NSW BioNet Atlas Records for threatened species - These comprise records that are validated by NSW government and generally comprise a reliable indicator of likely species

#### Uncertainties

Ecosure Desktop Assessment - This is a high-level desktop assessment to inform future surveys. Further onground studies have been conducted to refine information from desktop studies.  
NSW State Vegetation Type Map: Upper Hunter v1.0. VIS\_ID 4894 - This comprises broad-scale desktop mapping with limited ground survey and therefore was refined/updated during field surveys  
NSW BioNet Atlas Records for threatened species - Record locations may be amended/buffered to protect sensitive species and may not reflect accurate onground locations

Note: PDF may contain fields not relevant to your application. These fields will appear blank or unticked. Please disregard these fields.

## Section 8

### Proposed alternatives

Do you have any feasible alternatives to taking the proposed action?

Yes

No

Note: PDF may contain fields not relevant to your application. These fields will appear blank or unticked. Please disregard these fields.

## Section 9

### Person proposing the action

9.1.1 Is the person proposing the action a member of an organisation?

Yes  No

#### Organisation

Organisation name	Epuron Projects Pty Ltd
Business name	
ABN	84150163143
ACN	
Business address	Level 11, 75 Miller Street, North Sydney, 2060, New South Wales, Australia
Postal address	
Main Phone number	8456 7400
Fax	
Primary email address	info@epuron.com.au
Secondary email address	j.kasby@epuron.com.au

9.1.2 I qualify for exemption from fees under section 520(4C)(e)(v) of the EPBC Act because I am:

Small business  
 Not applicable

9.1.2.2 I would like to apply for a waiver of full or partial fees under Schedule 1, 5.21A of the EPBC Regulations \*

Yes  No

#### 9.1.3 Contact

First name	Julian
Last name	Kasby
Job title	Project Manager
Phone	02 8456 7400
Mobile	0411 638 651
Fax	
Email	j.kasby@epuron.com.au
Primary address	Level 11, 75 Miller Street, North Sydney, 2060, New South Wales, Australia

#### Address

#### Declaration: Person proposing the action

I, ANDREW DURRAN ON BEHALF OF EPURON PROJECTS P/L, declare that to the best of my knowledge the information I have given on, or attached to the EPBC Act Referral is complete, current and correct. I understand that giving false or misleading information is a serious offence. I declare that I am not taking the action on behalf or for the benefit of any other person or entity.

Signature: Andrew Durrin Date: 5 Mar 20

I, \_\_\_\_\_, the person proposing the action, consent to the designation of \_\_\_\_\_ as the proponent for the purposes of the action described in this EPBC Act Referral.

Signature: \_\_\_\_\_ Date: \_\_\_\_\_

Note: PDF may contain fields not relevant to your application. These fields will appear blank or unticked. Please disregard these fields.

### Proposed designated proponent

#### 9.2.1 Is the proposed designated proponent a member of an organisation?

Yes  No

#### Organisation

Organisation name	Epuron Projects Pty Ltd
Business name	
ABN	84150163143
ACN	
Business address	Level 11, 75 Miller Street, North Sydney, 2060, New South Wales, Australia
Postal address	
Main Phone number	02 8456 7400
Fax	
Primary email address	j.kasby@epuron.com.au
Secondary email address	

#### 9.2.2 Contact

First name	Julian
Last name	Kasby
Job title	Project Manager
